## ACKNOWLEDGEMENTS

Many special thanks are due to Prof Dr Siow Heng Loke, Dean, School of Graduate Studies Asia e University, who has kindly consented to be my supervisor for this study and whose sterling support has catalysed this effort. I am indeed very grateful and appreciate his valuable guidance in the write-up of this thesis. My gratitude also goes to Prof Dr Lim Chooi Kwa of Institute of Chinese Studies, Universiti Tunku Abdul Rahman (UTAR) for vetting through my questionnaires; Dr Chang Peng Kee of Universiti Kebangsaan Malaysia for his guidance on statistical data entries; Dr Soon Seng Tah of Ministry of Education Malaysia for the approval letter to conduct the survey in schools; Heads of Chinese primary schools and educators who have kindly helped in the questionnaires survey and interviews to add credence to the findings; and Ms Choo Min Joo for her excellent work in formatting my thesis. I wish also to record here my appreciation to the late Datuk Dr Ian Chia, a Harvard PhD scholar, whose encouragement and inputs given me as an old friend will always be cherished. My heartfelt appreciation to my wife, Goh Oi Neoh, whose support for my advocacy in lifelong learning is a natural inspiration for this thesis. To all others who have contributed to this study in one way or another, I will always treasure their assistance and concern.

Ho Nee Yong

## DECLARATION

I hereby declare that the thesis submitted in fulfillment of the PhD degree is my own work and that all contributions from any other persons or sources are properly and duly cited. I further declare that the material has not been submitted either in whole or in part, for a degree at this or any other university. In making this declaration, I understand and acknowledge that any breach in this declaration constitutes academic misconduct, which may result in my expulsion from the programme and/or exclusion from the award of the degree.

Name: Ho Nee Yong

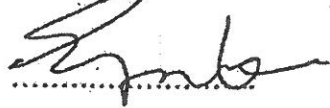

.....  
Signature of Candidate

Date: 5 March 2013

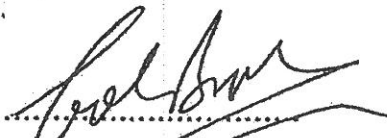

ENDORSEMENT

I certify that I have supervised/read this study and that in my opinion it conforms to acceptable standards of scholarly presentation and is fully adequate, in quality and scope, as a thesis for the fulfillment of the requirements for the degree of Doctor of Philosophy.

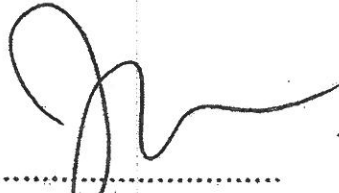

Professor Dr Siow Heng Loke  
Supervisor

**Relationships between School Characteristics and Character Building of Pupils  
in Chinese Primary Schools in Malaysia**

**Abstract**

The main research question for this study is: To what extent do school characteristics contribute to the character building of pupils in Chinese primary schools in Malaysia? The operational definitions of 'characteristics' in this study are the eight independent variables namely: 1) Dong Jia Jiao (DJJ 董家教), an abbreviation of School Boards of Governors and Parent-Teacher Associations, 2) Mother tongue education, 3) Trilingualism, 4) Confucianism, 5) School discipline, 6) Teachers, 7) Pedagogy, and 8) Environment - home and school. These eight variables were condensed into six based on Confirmatory Factor Analysis. The sole dependent variable is Character building of which the operational definition encompasses the eagerness to study, practising good values and having a sense of shame. (Chen, 1966) A total of 554 sets of questionnaires were sent to 45 Chinese primary schools in 14 states in Malaysia, and 508 sets (91.7%) were returned. The different tests used in this study included factor analysis, t-test, Analysis of Variance (ANOVA), Chi-square test, and Multiple Linear Regression. The triangulation approach was adopted to triangulate the quantitative data from the questionnaires derived from literature review, with the qualitative data obtained from the interviews. The final analysis of data showed that school characteristics contributed 36.8% to the character building of Chinese primary school pupils as follows: Teachers and pedagogy (24.3%), Environment (6.6%), Mother tongue education (3.1%), DJJ (1.2%), Confucianism and school discipline (1.0%), and Trilingualism (0.6%). The balance of 63.2% therefore comes from other

external factors which affect the character building of pupils. Recommendations have been offered to Chinese primary schools for the further enhancement of character building of pupils. The future research study on developing educational innovations towards character building, better national integration and racial harmony in Malaysia will be a vital research to pursue. From the insightful mentors of China from the East to the distinguished educators of the West come the teachings and practices of education which vary as greatly as the expanse between these continents. Their goal, however, is united: to spawn educated individuals with wholesome personalities. Their goal is plain and noble: for a better and more virtuous future generation through an all-round education. This study therefore aims to provide a harmony of learning to children and to nurture them with a versatile form of teaching. As the paths to a better and full education converge, so will the objectives of a sound knowledge, namely for children to be achievers in their careers while retaining their morals.

 <b>CHAPTER 5 DISCUSSION AND RECOMMENDATIONS</b>	
5.0 Introduction	271
5.1 'Teachers and pedagogy' and character building	271
5.1.1 Pupils must 'learn how to learn'	271
5.1.2 'Good teaching methods develop the multiple intelligences of children'	273
5.1.3 'Dedicated teachers do not work for pay only'	274
5.1.4 'Teachers can nurture pupils to have good character'	275
5.1.5 'The pupil-teacher relationship in my class is not good' (reversed)	276
5.1.6 'All pupils have the same learning ability' (reversed)	276
5.1.7 'Spoon-feeding method is the best pedagogy' (reversed)	277
5.1.8 'Pupils can acquire knowledge from the Internet'	278
5.1.9 'I am a teacher not because I like the profession' (reversed)	279
5.1.10 'Teachers can give negative comments on pupils in class' (reversed)	279
5.1.11 'My pupils have the initiative to do revision on their own'	280
5.1.12 "My pupils can think critically"	281
5.2 'Environment' and character building	283
5.2.1 'Nurturing pupils of good character has to begin at home'	283

	<i>Page</i>
5.2.2	'Small class sizes are good for close relationships between teachers and pupils' 287
5.2.3	'My pupils do not have homework every day' (reversed) 288
5.2.4	'Activities such as music, sports, and art are good for building character' 289
5.2.5	'Schools are ideal places to instil moral values' 292
5.3	'Mother tongue education' and character building 295
5.3.1	'Chinese primary schools do not educate pupils to be patriotic' (reversed) 296
5.3.2	'Pupils who undergo mother tongue education cannot become good citizens of the country' (reversed) 297
5.3.3	'Mother tongue education is the common aspiration of parents' 298
5.3.4	'Mother tongue education nurtures pupils to be of good character' 298
5.4	'Boards of Governors and PTAs (DJJ)' and character building 299
5.4.1	'The Board of Governors and PTA (DJJ) of my school support mother tongue education' 299
5.4.2	'The Board of Governors and PTA of my school stress the importance of character building of pupils' 300
5.4.3	'The Board of Governors and PTA of my school have good social-economic background' 300
5.4.4	'The Board of Governors and PTA of my school are not willing to donate money to the school' (reversed) 301
5.4.5	'The Board of Governors and PTA of my school bring the school and parents together' 302
5.5	'Confucianism and discipline' and character building 302
5.5.1	'It is good to teach pupils to be materialistic' (reversed) 302
5.5.2	'Playing truant is common among pupils in my class' (reversed) 303
5.5.3	'Confucianism teaches good values' 304

	<i>Page</i>
5.5.4 'Problematic pupils are born to give problems' (reversed)	304
5.5.5 'The teaching of Confucianism and character building are closely related in Chinese primary schools'	305
5.5.6 'Co-curricular activities are important in character building'	306
5.5.7 'Academic achievement is more important than character building' (reversed)	307
5.5.8 'I spend more time disciplining pupils than teaching'	308
5.5.9 'Corporal punishment is good for pupils'	309
5.6 'Trilingualism' and character building	313
5.6.1 Reading makes a man	313
5.6.2 Literature enriches language learning	315
5.6.3 Learning of languages should be of top priority	316
5.6.4 Learning more languages demand more time and effort	317
5.6.5 Four key elements that contribute to a school's success	318
5.6.6 The ability to master multiple languages is a great asset	320
5.7 Character building	322
5.7.1 'Self-discipline is a good virtue' (practising good values)	323
5.7.2 'Having a passion to learn is a good character' (eagerness in learning)	323
5.7.3 'Parental behaviour influences children's attitudes to learning'	324
5.7.4 'Pupils must learn table manners'	327
5.7.5 'Problematic children will never become good pupils' (reversed)	328
5.7.6 Children from a disciplined family know the meaning of 'shame' (having a sense of shame)	328
5.7.7 'My pupils cheat on tests in class' (reversed)	332

## CHAPTER 1

### INTRODUCTION

#### 1.0 Introduction

The Chinese schools in Malaysia have had a history of about 200 years, with the 100-year-old Confucian Chinese Independent High School in Kuala Lumpur as its living testimony. To the Chinese emigrants to Malaysia, education of their young is as important as craving a living in the new country. From the very outset, the Chinese wanted not only to impart useful knowledge but also to nurture the Confucian values of respect for the elders and character development. Of equal importance they hoped to instil values of scholars in their children. Character building is thus synonymous with Chinese education and it therefore has become the main purpose of Chinese parents wanting to send their children to Chinese schools since the early years. Parents wanted their children to be nurtured to have filial piety, good manners, and integrity, the last of which was testified by businessmen whose words were as good as sealed agreement. The schools were self-reliant, the teachers dedicated, and the school culture was that of learning and educating.

As years passed by and with the society becoming more affluent, the status of teachers was affected in a materialistic world. Respect for individuals began to be weighed on silver and gold. Teachers who are not decently paid might become the object of sarcasm (Becker, 1949); and though monetary returns may not be the sole motivating factor in teaching, a low salary neither inspires the teachers. (Kelly, 2010) With the emergence of globalization and easy access of communications at current

time, human behaviours, social values, mores change and Criminal Breach of Trust have become common even among the top leaders of organisations and political arena. Thus there appears to be a need for rethinking the school on how moral education and the teaching of good citizenship are being taught.

The Chinese primary schools in Malaysia are unique because of their school characteristics. This in turn affects the character building of pupils. The teaching of three languages, the teaching of Confucian values, and the existence of Boards of Governors are characteristics of Chinese primary schools but not the National schools. The school characteristics are also common knowledge to Chinese educationists and society for the past 50 years. Hence, the conceptual definition of these school characteristics, together with character building, will justify their selection as the Independent Variables (IVs) and Dependent Variable of this research.

If the Chinese primary schools of the early years were synonymous with character building, can it be said to be so in the twenty-first century? The school characteristics basically remain the same. It is the character building of pupils in these schools that is to be examined in this research. The research is to find out whether the Chinese primary schools still maintain that legacy of having produced pupils of character, with existing school characteristics. The main research question will then be: To what extent do school characteristics contribute to the character building of pupils in Chinese primary schools in Malaysia? Relationships between school characteristics and character building of pupils in selected Chinese Primary schools are thus deemed to be worth researching.
