A BILINGUAL APPROACH TO ISLAMIC STUDIES EDUCATION FOR
UPPER PRIMARY STUDENTS IN MALAYSIAN INTERNATIONAL
ISLAMIC SCHOOLS

SYEDA RABIA TAHIR

A Thesis Submitted to Asia e University in
Fulfillment of the Requirements for the
Degree of Doctor of Philosophy

October 2023

ABSTRACT

Many international Islamic schools in Malaysia enroll learners from various multicultural and multilingual backgrounds. In these schools, proficiency in both Arabic and the language of instruction, typically English, is required for Islamic education. However, many students encounter difficulties because of limited proficiency in these two languages. Thus, it is crucial to examine how the teaching and learning (T&L) of Islamic studies (IS) is conducted in international Islamic schools. This study aimed to answer the following research questions: a) What is the nature of the curriculum of IS in international Islamic schools?; b) What bilingual teaching and learning methods are employed for IS in international Islamic schools? ; c) How is the assessment of IS conducted in international Islamic schools? ; d) What challenges are faced by stakeholders in learning IS in a bilingual environment? ; and e) What are the perceptions of stakeholders regarding the bilingual education of IS in international Islamic schools? The study adopted a mixed-method, sequential explanatory research design which involved the use of questionnaires and interview protocols. The participants of the study were from seven international Islamic schools in Selangor and Kuala Lumpur, Malaysia, including principals/heads of department, teachers, students and parents (n=449). A purposeful sample of 54 participants was selected for stakeholder interviews. The results of the study revealed that: a) the curriculum appears to emphasise the inculcation and practice of Islamic philosophy, teacher and student- centered T&L as well as bilingual practices; b) T&L involves use of Arabic and English with a focus on the application of Islamic values; c) an emphasis on summative assessment, with English as the language of assessment; d) the use of two languages in T&L is a major challenge for teachers and learners; e) all stakeholders view the practice of bilingual education for the Islamic studies subject positively. This research contributes to our understanding of T&L as well as effective classroom communication by : a) highlighting the benefits of a bilingual approach to IS within multicultural and multilingual school communities; b) expanding the discourse in the interdependence of Arabic and English in mediating meaning during IS lessons; c) deepening knowledge on instructional policies in relation to language integration in the classroom, as well as challenges in the use of a bilingual approach to IS instruction; and d) providing insight to teachers' role and competencies in implementing IS lessons, and how they are related to teacher professional development.

Keywords: International Islamic schools, Islamic education, bilingual education, teaching and learning methods, Arabic and English, curriculum, stakeholders, perceptions

APPROVAL

This is to certify that this thesis conforms to acceptable standards of scholarly presentation and is fully adequate, in quality and scope, for the fulfilment of the requirements for the degree of Doctor of Philosophy.

The student has been supervised by: **Professor Dr Nooreiny Maarof**

The thesis has been examined and endorsed by:

Professor Dr Kuldip Kaur Karam Singh

Adjunct Professor, Asia e University

Examiner 1

Professor Dato' Dr. Noraien Mansor

Professor, Taylor's University

Examiner 2

This thesis was submitted to Asia e University and is accepted as fulfilment of the requirements for the degree of Doctor of Philosophy.

Professor Dr Siow Heng Loke

Chairman, Examination Committee

Asia e University

5th October 2023

DECLARATION

I hereby declare that the thesis submitted in fulfilment of the PhD degree is my own work and that all contributions from any other persons or sources are properly and duly cited. I further declare that the material has not been submitted either in whole or in part, for a degree at this or any other university. In making this declaration, I understand and acknowledge any breaches in this declaration constitute academic misconduct, which may result in my expulsion from the programme and/or exclusion from the award of the degree.

Name: Syeda Rabia Tahir

Signature of Candidate:

Date: 5 October 2023

ACKNOWLEDGEMENTS

‘Alhamdulillah’ (All Praise and Thanks belongs to Allah)

I would like to take this opportunity to express my heartfelt gratitude to all those who have supported me throughout this journey and contributed to the successful completion of my thesis. Their unwavering encouragement, guidance and assistance have been instrumental in shaping the outcome of this research.

First and foremost, I extend my deepest appreciation to my supervisor, Professor Dr. Nooreiny Maarof, for her invaluable guidance, unwavering support and continuous motivation. Her expertise, patience and insightful feedback have been indispensable in refining my research and navigating through the challenges I encountered.

I am also immensely grateful to the faculty members of Asia e University for their commitment to impart knowledge and provide a stimulating academic environment. Their dedication to excellence has inspired and motivated me to strive for intellectual growth.

I would like to extend my heartfelt gratitude to my husband, Syed Tahir Hussain, my three kids, which are Muhammad Bilal, Manha and Manahil, as well as my friends for their constant encouragement and belief in my abilities. Their unwavering support and understanding have been a source of strength and motivation throughout this endeavor.

I would like to express my gratitude to the participating international Islamic schools for their willingness to share their valuable insights and time, without which this study would not have been possible. Their contributions have added immense value to my research and deepened my understanding of the subject matter.

In conclusion, I wish to express my deepest gratitude to all those who have directly or indirectly contributed to my thesis. Your support and encouragement have been invaluable, and I am truly grateful for the opportunities and knowledge I have gained throughout this research journey.

‘Alhamdulillah’ (All Praise and Thanks belongs to Allah)

Thank you.

CHAPTER 1

INTRODUCTION

1.1 Background of the Study

Malaysia, which is a multi-ethnic and multi-religious nation situated in Southeast Asia, is renowned for its rich tapestry of languages and cultures, primarily comprising Malays, Chinese and Indians (Ilhavenil & Logeswaran, 2023). This linguistic diversity is prominently reflected in the country's education system, where three distinct mediums of instruction prevail. Firstly, Bahasa Malaysia, which is the national language, serves as the medium of instruction in both primary and secondary national schools. Secondly, Mandarin and Tamil are authorised as mediums of instruction in national-type (vernacular) primary Chinese and Tamil schools respectively (Mohd Adnan & Airil Haimi, 2017; Santoso & Kinasih, 2022). Additionally, the English language is recognised as a second language in Malaysia, which is compulsory across all educational levels from primary to tertiary in the curriculum (Irma Wani et al., 2022).

In line with Malaysia's Education Blueprint (Ministry of Education Malaysia, 2013-2025), the Malaysian education system actively promotes bilingualism and multilingualism. This strategic approach advocates every child to acquire proficiency in an additional language, thus embracing and capitalising on the country's multicultural and multilingual ethos. In this context, Kartashova and Osipova (2022) highlighted that many students in Malaysia opt to expand their language repertoire beyond Bahasa Malaysia and English, aiming to better prepare themselves for the global workforce.

According to Savski (2020), the introduction of the Common European Framework of Reference for Languages (CEFR) in Malaysia has primarily emphasised Bahasa Malaysia and English. This emphasis has resulted in other languages, especially indigenous and regional ones, being marginalised. Some view this one-sided implementation of the CEFR as a missed opportunity to establish a more inclusive and equitable language policy that can accommodate Malaysia's linguistic diversity. The advocacy for bilingual and multilingual education, which is in conjunction with the CEFR, presents a more harmonious alignment with Malaysia's linguistic and cultural complexity. It functions as a mechanism to honour and safeguard the nation's linguistic heritage and foster intercultural understanding among its diverse linguistic communities.

Tupas and Sercombe (2014) extensively examine the intricate relationship between language, education, and nation-building in Southeast Asia, shedding light on the region's historical complexities shaped by immigration and colonial influences. Through an analysis of language policies and their role in nation-building processes, the book underscores the pivotal function of education systems in institutionalizing dominant and national languages while addressing the challenges posed by linguistic diversity, particularly in relation to minority languages. The experiences documented in the book, particularly those of the Philippines in implementing bilingual education and Mother Tongue-Based Multilingual Education (MTB-MLE), offer valuable insights into the management of linguistic diversity within a nation-building framework.

Drawing parallels with the Philippines' experiences, the book provides a framework for understanding similar challenges faced by other Southeast Asian nations, such as Malaysia. By examining the Philippines' efforts in incorporating

MTB-MLE and navigating issues of linguistic diversity, assimilation, and cultural preservation, the book offers practical lessons applicable to multicultural contexts like Malaysian international schools. As highlighted by Tupas and Sercombe (2014), education systems play a pivotal role either in reinforcing linguistic and educational status quos or in serving as platforms for cultural preservation and identity affirmation. Thus, the experiences documented in the book underscore the importance of awareness and understanding in leveraging minority learners' mother tongues in education, contributing to broader discussions on bilingual and multilingual education within the region.

In Malaysia, the education system faces challenges in promoting bilingual communication within its multicultural setting. Research conducted by Hamid and Razak (2017) examined the impact of bilingual education in Malaysian primary schools, revealing that students in such programs displayed greater proficiency in English compared to their counterparts in Malay-medium schools. However, concerns about unequal access to quality bilingual education were raised, particularly for students from lower socioeconomic backgrounds (Hamid & Razak, 2017).

Another study by Wong and Noor (2019) delved into the obstacles surrounding the integration of mother tongue languages, such as Mandarin and Tamil, into Malaysian classrooms. They identified a dearth of qualified teachers and standardized curriculum materials for these languages within the bilingual education framework (Wong & Noor, 2019).

Further insights were provided by Beagrie et al. (2020), who explored the experiences of teachers delivering bilingual education in Malaysia. Their findings underscored the necessity for more robust teacher training programs focused on

effective bilingual instructional methods and strategies for managing multilingual classrooms (Beagrie et al., 2020).

These studies align with Tupas and Sercombe's (2014) emphasis on the complexities inherent in language policy and education. While bilingual education offers benefits such as enhanced language proficiency, ensuring equitable access and incorporating cultural understanding remain critical considerations for its successful implementation within Malaysia's diverse context.

Pakendorf et al. (2021) endorse the notion that nurturing a bilingual and multilingual approach within Malaysia not only recognises its historical linguistic richness, but also fosters an environment of inclusivity and equity for its citizens. This approach acts as a bridge among diverse linguistic communities, facilitating intercultural exchange and fostering a sense of unity in Malaysia's diverse population. In the context of our increasingly globalized world, multilingualism emerges as an asset uniquely embodied within Malaysia's multicultural and multilingual society. When duly celebrated and supported, this multilingualism can significantly contribute to national cohesion, cultural preservation, and intercultural harmony.

The prevalence of a bilingual approach in Malaysian education is evident across public, private and international educational institutions. A noteworthy development is that Malaysia leads Southeast Asia in terms of student enrolment in premium English-medium international schools, with the recent removal of the 40% enrolment restriction on local Malaysian students in these institutions (ISC Research, ISC). International schools have been a cornerstone of the Malaysian education sector since their establishment in the 1950s, thus catering to the educational needs of expatriate families and those seeking a Western-style education (Siti Maziha et al., 2021; Miftahuljanah et al., 2020; Nor-Ahmad et al., 2023). These institutions have gained

prominence due to their emphasis on a rigorous academic curriculum, English-medium instruction and exposure to international cultures (Rahman & Singh, 2020; Ben-Jacob & Wang, 2020).

A recent study by Alnawasreh et al. (2019) explored the motivations of Malaysian parents for enrolling their children in international schools. The findings revealed that parents were primarily drawn to the perceived advantages of an international education, including better academic outcomes, enhanced English language proficiency and exposure to a global perspective. These findings aligned with those of Sahiruddin and Manipuspika (2021), revealing that parents' motivations for enrolling children in bilingual or international school were more integrative than instrumental. The use of English as a lingua franca within the context of a multicultural world has motivated parents and teachers to introduce English at the early stages of education. The bilingual approach was found to be effective in the English delivery system for social and cultural considerations.

The growth and popularity of international schools in Malaysia can be attributed to several factors, including the country's economic development, an increasing expatriate population and rising demand for quality education (Ahmad & Abdullah, 2020). As Malaysia transitioned from an agricultural to an industrialised economy, the demand for qualified professionals with international exposure grew, leading to a surge in demand for international education (Sulaiman & Ismail, 2019).

International Islamic schools in Malaysia have gained increasing popularity among Malaysian parents who seek an educational system that seamlessly melds international academic standards with the infusion of Islamic values. These schools offer a dual emphasis on a global curriculum and Islamic teachings, reflecting a growing demand for educational institutions that provide a holistic approach to
