

What makes AeU unique is its flexible learning environment.

Convenient ODL mode

ASIA e University, or in short AeU, was established in 2007. It is a flexible mode, full-time or online distance learning (ODL) international university by Asians for Asia. It is supported by 32 member countries under the Asia Cooperation Dialogue.

In just six short years, AeU has established its reputation as an acclaimed dual mode institution providing forward-thinking, cross-border programmes. It has 10,000 students from Malaysia, India, Bangladesh, Pakistan, Sri Lanka, Cambodia, Vietnam, Indonesia, Saudi Arabia, the UAE, Oman and more.

At AeU, learning from the best equips you with global perspectives to deal with real work-life situations. The dynamic faculty comprises distinguished, highly experienced professionals from a host of industries and from various parts of the world.

Additionally, external examiners from reputable universities ensure your academic credentials from AeU are maintained at the highest standards at all times.

What makes AeU unique is its flexible learning environment. The curriculum and programmes are designed with a clear understanding of your needs.

AeU supports this with independent learning and invaluable face-to-face interaction with faculty members, through media such as print, multi-media,

audio-visual, online materials, e-mail and discussion forums. Some courses combine classroom interactions with online learning, providing you meaningful participation via instructor-facilitated online forums and virtual classroom experience.

While your actual duration of study will vary according to the number of credit units or courses you choose to pursue in a semester, you can complete a basic undergraduate degree programme in four years, a master's degree in two years and a PhD in three to four years.

The academic year comprises three semesters – January to April, May to August and September to December. Classes are held on weekday evenings and weekends.

The digital library known as University Knowledge Centre forms a large bank of invaluable resources to meet your learning needs.

A unique feature of AeU delivery and administrative system is the existence of a number of Learning Centres in different locations throughout Malaysia and the world. Currently, AeU has 23 Learning Centres in Malaysia and more are expected in the near future.
